

I am pleased to announce that the clinic will re-open on May 22, beginning with a phased-in approach and modified schedule. As health care providers, acupuncturists are considered “essential workers” and have not been forced to close in the early stages of the pandemic. I have, in solidarity with acupuncture practitioners across the nation, chosen to temporarily shutter my practice in voluntary compliance with statewide mandates.

Based on current epidemiological modeling for our state – and after incorporating new safety guidelines established by CDC and DOH – I have chosen to re-open in 3 weeks. This extended closure will honor Governor Inslee’s new mandate and will allow me additional time to procure now-compulsory PPE. I have compiled a pre-screening questionnaire, available for review on my website; all patients will be required to complete this form prior to each treatment. I am confident that by implementing new precautionary measures, I will be able to provide a safe and healing space for the community.

Looking forward to seeing you soon!
